Udacity: accessible, affordable, engaging, and highly effective higher education online

06/2016 - 12/2016

#### Front-End Nanodegree

- HTML, CSS, responsive design, JavaScript,
- jQuery, AJAX, optimization, JavaScript testing with jasmine
- mapping applications using the Knockout framework

## Skills & Competences

React		PostgreSQL	
Angular		MongoDB	
Node		HTML	
CSS		Gulp	
Bootstrap		JQuery	
Wordpress		Git	

## Projects

### Trellin- (02/2017)

- An ambitious group effort to combine LinkedIn core features and Trello together. Major technology used include React, Redux, postgresSQL, AmazonS3, React drag and drop.

### CrowdFunder (01/2017)

- This project goal was to rebuild the main feature of kickstarter. It took lot of attention to details to make a multipage form replica
- Technologies used: React/Redux, stripe.js for the donation and reward, google auth, postgresSQL in the backend, and Semantic-ui.

### SnowRider (12/2016)

- An angular app which allows you to find skiing/snowboarding resorts and renders them through google maps api. css/design feature include slideing AoS JQuery Library. Materialize css as ui-helper and parallax animation.

### CastGaming (11/2016)

- A gaming forum for my top online strategy games: Dota 2, World of Tanks, Smite, HearthStone, Overwatch.
- Technologies used: Angular, Node.js, Mongoose, socket.io and Bootstrap. Include facebook auth login for user model, chat-box with socket.io, embed youtube-video

### MovieFav (10/2016)

- A movie app that allows you to set search from the Movie Database and put it in your favorites. Technologies: Angular, Restful API's, Bootsrap

### Frogger Game (08/2016)

- Recreated a frogger game with Object Oriented JavaScript and HTML5 Canvas.

## Achievements

### ManjCode (11/2016)

Personal Blog for all things coding: <http://www.manjcode.com>

### Transcend Award (06/2016)

Part of the first Transcend Award scholarship by Udacity.
